Subject: HINGE SPACER AND WASHER
SPACERS ADDED.

A 30927-001 spacer has been added for installation between the 31018-001 hinge and the 31017-001 injector access door to improve the fit of the door in the oil cooler support.

50070-019 washers have been added for installation between the mounting flanges of the 50197-001 oil cooler to take up any space which may exist between the flanges and the ends of the 30504-044 spacer tubes due to variations in the locations of the flanges on the oil cooler.

Additional parts are being sent to all customers to whom the 920 kit has been shipped, and this change will be included in the next product manual revision.

Enclosures:

1 EA 30297-001 Spacer, hinge
12 EA 50070-019 Washer
