Subject: MODIFY 31019-001 SPRING
TO ELIMINATE INTER-
FERENCE WITH AIRBOX

The 31019-001 spring which is part of the induction door assembly that attaches to the airbox cover must be modified by cutting off the bent up tip of the spring at its outboard end.

This modification, which must be made before attaching the airbox cover assembly to the airbox, eliminates the possibility of contact between the tip of the spring and the inner surface of the airbox.
