Subject: REVISED PRODUCT BROCHURES
AND NEW PRICE LIST FOR
EAGLE II AIRCRAFT KITS

Enclosed are revised versions of the following documents describing the Eagle II aircraft construction system:

70116-001 Brochure: Eagle II aircraft Kit Descriptions

70280-001 Brochure: Eagle Aircraft Paint Designs

D-023 Price List: All Christen Products, Kits, and Parts

The kit descriptions booklet has been updated to include partial kits such as the 917 Series Engine Kit less Engine, and to correct previous omissions and typographical errors. The booklet also lists the new version of the 912 Navcom Kit which now includes an Edo-Aire radio in place of the Narco Escort 110 radio which is no longer manufactured. A transponder kit and an ELT kit have been added as well.

The paint designs brochure replaces the interim paint design information which you may have received previously. Details about paint color formulations for the Eagle designs are presented in the 923 product manual.

No price changes have been made in the new price list except for the new 912 Navcom Kit which has increased due to the higher cost of the better quality Edo-Aire radio. Numerous parts and tools have been added in anticipation of our publication and release of the special tools and supplies catalog in the next few weeks.

We hope that this information will be interesting and helpful to you.
