Subject: CANOPY GUIDE BUSHINGS
MOVED FROM 915 CANOPY
KIT TO 907 FUSELAGE
EQUIPMENT KIT

The 915 Canopy Kit originally included six each brass guide bushings which are assembled into sockets on the fuselage frame to support the canopy frame assembly when in the closed and locked position.

Based on recent field experience with canopy system installations, it has been determined that the guide bushings can be installed in the fuselage more conveniently as a part of the 907 Fuselage Equipment Kit than as part of the canopy kit. Accordingly, the guide bushings have been transferred from the 915 Kit to the 907 Kit. The installation of the guide bushings was added to the 907 Product manual as a part of Manual Revision 13 which was issued recently.

Six each 31221-001 canopy guide bushings are being sent to all Eagle builders to whom the 907 Kit has been delivered. The bushings should be installed in the fuselage kit as soon as convenient.
