Subject: LOCKING LUG FOR EDO-AIRE
RADIOS IN 912 NAVCOM
KITS

A new locking lug, Christen part no. 30397-001, is enclosed. This lug is supplied to replace the original locking lug in all Edo-Aire radio models.

The new locking lug provides more secure retention of the Edo-Aire radio during negative-g maneuvers. It is a direct replacement for the original lug.

Installation instructions for the new lug will be provided in the next manual revision for the 912 Navcom Kit.

Only aircraft equipped with an Edo-Aire radio are affected. Discard the lug if a different radio type is used.
