Subject: CHANGE OF FUEL SIGHT GAGE
MATERIAL IN EAGLE II
AIRCRAFT 909 FUEL SYSTEM
CONSTRUCTION KIT

The 50364-006 transparent vinyl tubing used for the fuel sight gage in the subject kit has been replaced with 50858-006 transparent urethane ester tubing which will not lose its flexibility with long-term exposure to aviation fuel and which is less susceptible to staining by fuel dyes.

The 50858-006 tubing will be standard in all 909 Kits delivered in the future, and the tubing and related installation materials required for retrofit to existing Eagle II aircraft is being supplied with this letter.

Retrofit installation should be performed as described in Steps Q-40 and Q-41 in Volume II of the 923 Kit product manual.

ENCLOSURE:
